THE CHEAT CARD

Launch guides have published 17 of the game's 61 story cheats. Here they are, with what each one costs you to unlock.

1 STORY FIRST

Cheats stay locked until the main story is finished. PC Gamer tried an earlier save and the codes did nothing.

2 SAVE FIRST

An active cheat is reported to block saving and switch off trophies and achievements. Save, play, reload.

3 NO 100% HELP

Because you can't save with a cheat on, cheats can't carry progress on side activities or challenges.

HOW TO ENTER A CODE

1. Open the phone: **D-pad up**
2. Open cheat entry: hold L1 press R1 on PS5 · hold LB press RB on Xbox
3. Type the D-pad directions in order

Some guides say hold both buttons together. If one way fails, try the other. Xbox buttons come from PowerPyx alone so far.

UNVERIFIED

Reported by launch-day guides, not yet tested in the game by us. Watch the near-twins: Bulldozer and Pumper differ only in the last press, and so do Infinite Ammo and No Reload.

STARTER GUIDE · NO SPOILERS

Five checks before your first session. GENERAL ADVICE

01 MAKE IT READABLE

Set brightness on the screen you'll actually play on, so night scenes stay readable without looking washed out. Check text size from where you sit.

02 GET USED TO THE CONTROLS

Spend a few minutes just moving and aiming. Change one control setting at a time so you know what helped.

03 HEAR WHAT MATTERS

Balance dialogue, effects and music on your usual speakers or headphones until speech is clear.

04 RECORDING? TEST FIRST

Record a short clip and play it back. Check what game audio and music it picks up before you post.

05 STAY SPOILER-FREE

Follow the game's own prompts early on. When stuck, search the exact problem, not a whole mission walkthrough.

BEFORE YOUR FIRST MISSION

Story missions are reported to have no replay. Save at the start and end of every chapter. One guide counts 15 manual save slots.	UNVERIFIED Reported by PowerPyx
Money matters more than before: you'll need to earn it in the open world to keep the story moving.	UNVERIFIED Reported by GamesRadar, quoting Rockstar North's Rob Nelson
An hourglass on the map marks an optional mission that won't stay around. Take it when you see it.	UNVERIFIED Reported by PowerPyx (1 source)
Plan for a long one: a Rockstar North developer's run took about 80 hours with optional goals. One guide estimates 60 to 80 hours.	UNVERIFIED Reported by Pure Xbox · PowerPyx
Story missions are reported to have no gold medals. Medals show up on shooting range and race challenges.	UNVERIFIED Reported by PowerPyx · Beebom

SPOT A FAKE GUIDE

Some walkthroughs were written before launch, or made up, and still rank on Google. None of these mission names appear in the launch-day lists we compared (PC Gamer, PowerPyx, VGC):

~~Fresh Start~~ ~~The Jewelry Store Job~~ ~~Port Authority~~ ~~The Leonida Job~~ ~~The Kelly County Depot~~ ~~The Setup~~

A guide listing gold-medal targets for story missions was also likely written before launch.

HOW WE CHECKED

Who: the Mission Stash team.

How: compared launch-day guides on 18 Nov 2026 and wrote everything in our own words, with AI help. A guide that credits another counts as one source.

Not yet: tested in the game. When we do, statuses change to VERIFIED with the date and console.
